

Garv Akolia

React Developer & AI Integration Specialist

Noida, Uttar Pradesh — garvak23@gmail.com — (+91) 9599187665 — portfolio — github.com/Garv2003-dot

Professional Summary

Results-driven software engineer specializing in rapidly shipping high-performance React web applications and integrating custom AI workflows. Proven ability to take complex client requirements and deliver scalable, end-to-end products—from secure enterprise portals to Gemini-powered automated platforms. Focused on writing clean, maintainable code to accelerate deployment timelines and deliver immediate business value.

Technical Skills

- **Frontend Ecosystem:** React.js, Next.js, React Native, Tailwind CSS, Redux Toolkit, Zustand
- **Backend & AI Integration:** Node.js, Express, Gemini API, AI Intent Parsing
- **Database & Infrastructure:** PostgreSQL, Supabase, Vercel, Docker, Turborepo, Git
- **Programming Languages:** JavaScript, TypeScript, Python

Professional Experience

Veersa Technologies

May 2025 – Present

Frontend Developer

Architected and rapidly shipped frontend solutions across three major enterprise domains:

- **Enterprise AI Platform (Next.js, Node.js):** Built a fault-tolerant resource allocation system powered by Gemini AI intent parsing and a deterministic matching algorithm to automate demand-supply workflows.
- **Healthcare Web App (React.js):** Rapidly developed and deployed a highly responsive, scalable React/TypeScript interface featuring fully secure file upload pipelines and Redux Toolkit state management.
- **Aviation Mobile App (React Native):** Shipped cross-platform mobile features for a US-based airline client, optimizing rendering performance and ensuring strict cross-ecosystem UI consistency.

Telus International

Jul 2024 – Jan 2025

SDET Intern (Python)

- Built automated `pytest` suites and enforced TDD practices, enhancing code reliability for rapid deployments.

Bhuma Infotech

May 2024 – Jul 2024

Web Development Intern — DIAC (Govt. of India)

- Contributed to React interfaces and explored generative AI integration for automated document summarization.

MVM Business Services

Mar 2023 – May 2023

Web Development Intern

- Created and shipped marketing-focused web properties utilizing HTML, CSS, React, and Node.js.

Key Projects

Packvision — Intelligent Packaging Monitoring System

React 19, TypeScript, Node.js, Express, Zustand, S3, Vercel Deployment

- **Rapid Frontend Deployment:** Architected and shipped an enterprise-grade React/TypeScript video analytics dashboard deployed on Vercel for high-speed delivery and edge-caching.
- **Hardware & Cloud Pipelines:** Leveraged browser APIs for real-time webcam media capture, designing secure client-to-cloud S3 upload workflows via temporary presigned URLs.
- **Role-Based Access Control:** Implemented secure JWT middleware to dynamically enforce UI permissions and API boundaries across Admin and Packager roles.

vCrew — AI-Driven Resource Allocation System

Next.js 14, React 18, Express, Supabase, Turborepo, Gemini API

- **AI Intent Parsing Integration:** Integrated the Gemini API to establish a natural language processing layer that translates unstructured user inputs into strictly validated JSON schemas.
- **Scalable Monorepo Architecture:** Engineered a Turborepo-based structure cleanly isolating the Next.js client and Express AI layer, enabling rapid parallel iteration and deployment.
- **Real-Time State Synchronization:** Utilized Supabase for persistent relational storage, ensuring bidirectional consistency between project bandwidth constraints and employee utilization metrics.

Education

B.Tech (Computer Science)

2021 – 2025

Manipal University, Jaipur

Amity International School, Noida

Class 12 (2021) | Class 10 (2019)
